

VpCI™ METALWORKING PRODUCTS

VCI-323 M

PRODUCT DESCRIPTION

VCI-323 M is a vapor corrosion inhibiting oil-based concentrate for use with working engine systems. VCI-323 M provides excellent protection in indoor and outdoor air conditions.

VCI-323 M protects in two unique ways. First, oil-soluble corrosion inhibitors offer a tenacious film which clings to metal surfaces, giving excellent contact corrosion protection. In addition to this film barrier, Cortec VCIs release vapor phase corrosion inhibitors into the air above the oil. These VCIs attach electrochemically to the metal surface for additional corrosion protection.

FEATURES

- Metal-free
- Low viscosity
- Universal corrosion protection to ferrous and non-ferrous metals
- Does not contain hazardous chromates, nitrites or phosphate inhibitors
- High flash point
- Non-toxic and thermally stable, providing long-lasting contact and vapor phase corrosion inhibitors
- Will pass through a filter mesh size of 1 micron
- Can be used in hydraulic applications
- Protects metals in a corrosive gas environment (H₂S)
